

$$a_1 + a_r + a_s = 21$$

سؤال ۱

$$a_1 \times a_r \times a_s = 9K \rightarrow (a_r)^3 = 9K \Rightarrow \boxed{a_r = K} \Rightarrow \frac{a_r}{q} + a_r + a_r q = 21$$

$$\left(\frac{K}{q} + Kq = 14 \right) \times q \Rightarrow \frac{K}{q} + K + Kq = 14$$

$$Kq^2 - 14q + K = 0 \xrightarrow{\text{تجزیه}} q^2 - 14q + 14 = 0 \Rightarrow \begin{cases} q = \frac{14 \pm \sqrt{196 - 56}}{2} \\ q = -K \end{cases}$$

$$b^2 = ac \Rightarrow (2m)^2 = (m^2 + K)(m^2 - 2)$$

سؤال ۲

$$4m^2 = m^4 - 2 + 2m^2 \Rightarrow 2m^2 = m^4 - 2 \Rightarrow m^4 - 2m^2 - 2 = 0$$

$$(m^2 - K)(m^2 + 2) = 0 \Rightarrow \begin{cases} m^2 = -2 \rightarrow \text{غیرممکن} \\ m^2 = K \end{cases}$$

$$m = \pm \sqrt{K}$$

$$m^2 + K = 14, m^2 - 2 = 14 \Rightarrow a_n = 14, K, 2, 1, \frac{1}{2}, \frac{1}{14}, \frac{1}{14^2}, \dots$$

$$S_n = a_1 \left(\frac{q^n - 1}{q - 1} \right) \Rightarrow S_n = 14 \left(\frac{1 - \frac{1}{14^n}}{1 - \frac{1}{14}} \right) = 14 \times \left(\frac{1 - \frac{1}{14^n}}{\frac{13}{14}} \right)$$

$$14 \times \left(\frac{1 - \frac{1}{14^n}}{\frac{13}{14}} \right) = 14 \times \frac{1 - \frac{1}{14^n}}{13} = \frac{14}{13} \left(1 - \frac{1}{14^n} \right)$$

$$1 + q + q^2 + q^3 + q^4 = \frac{14}{13}$$

سؤال ۳

$$a_1 = 2K^3$$

$$a_1 + a_r + a_s + a_t + a_u = 9$$

$$2K^3 + 2K^3q + 2K^3q^2 + 2K^3q^3 + 2K^3q^4 = 2K^3 \times \frac{14}{13} = \frac{28K^3}{13}$$

$$d = \frac{qK - 1}{\omega + 1} = \log(\omega) \Rightarrow \omega = 3^2, \omega = A$$

سؤال ۴

$$q = \frac{qK}{1} = q^{\omega+1} \Rightarrow q = \pm 2 \Rightarrow \omega = \pm 1 = B \Rightarrow A+B = 3$$

سؤال ۵

$$-2\epsilon, -\frac{q\omega}{K}, \dots \Rightarrow d = \frac{1}{K}$$

سؤال ۶

$$a_{101} = a + 100d \Rightarrow -2\epsilon + 2\omega = 1$$

$$a_{101} = 1 \Rightarrow a_1 = 1 \Rightarrow 1 = aq^V \Rightarrow 13 \times q^V = 1 \Rightarrow \boxed{q = \frac{1}{13}}$$

$$d' = vad \quad v.d + vad = 0 \quad \text{ادامه ضرب سوال ۱۰}$$

$$d = va \quad vd(1.d + a) = 0 \quad \rightarrow d = -\frac{a}{v}$$

$$3a + 1.d = v^3 \quad \rightarrow d = -\frac{a}{v}$$

$$3a + v.a = v^3 \Rightarrow a = 1 \Rightarrow d = va \Rightarrow \boxed{d = v} \quad \text{Date:}$$

سوال ۲ (۱/۵)

$$\frac{a_p}{a+rd}, \frac{a_v}{a+rd}, \frac{a_q}{a+nd} \Rightarrow (a+rd)^2 = (a+rd)(a+nd)$$

$$a^2 + 3rd + 1pad = a^2 + 1rd + 1oad \Rightarrow 2od = -rad$$

$$a_q = -rd, a_v = -rd, a_p = a+rd = -nd \Rightarrow a = -1od$$

$$a_1, a_p, a_v \rightarrow -1od, -rd, -nd$$

$$v.d = -rad \rightarrow d = 0 \text{ می شود غیر مستقیم!}$$

$$d = -\frac{a}{1}$$

سوال ۵ (۲)

$$\frac{a_p}{a+d}, \frac{a_k}{a+vd}, \frac{a_n}{a+vd} \Rightarrow (a+vd)^2 = (a+d)(a+vd)$$

$$a^2 + 9d^2 + 4ad = a^2 + vd^2 + 1ad \Rightarrow 2d^2 = rad \Rightarrow a = d$$

$$a_1 = d = \frac{1}{r} \Rightarrow a_p = a+d = \frac{1}{r}, a_k = 1, a_n = r$$

$$\frac{1}{r} \rightarrow \frac{1}{r}, 1, r \Rightarrow q = r \Rightarrow a_1 = aq = \frac{1}{r} \times r = 1$$

$$rd^2 - rad = 0 \Rightarrow rd(d-a_1) = 0 \Rightarrow \frac{a_1}{rd} = d \Rightarrow d = 0 \Rightarrow a_p = a_n = a_k = 1$$

سوال ۸ (۲)

$$\frac{3a_p}{3a_q}, \frac{2a_p}{2a_q}, \frac{a_k}{a_q} \Rightarrow 2b = a + c \Rightarrow 4aq^2 = 3aq + aq^3$$

$$4aq^2 = aq(3 + q^2) \Rightarrow 4q = 3 + q^2 \Rightarrow q^2 - 4q + 3 = 0 \Rightarrow (q-1)(q-3) = 0$$

$$\boxed{q=3, q=1}$$

سوال ۹ (۱/۵)

$$\frac{a_k}{a+\frac{v}{2}}, \frac{a_n}{a+\frac{v}{2}}, \frac{a_{11}}{a-\frac{v}{2}} \Rightarrow b^2 = ac \Rightarrow (a-\frac{v}{2})^2 = (a-\frac{1}{\epsilon})(a-\frac{v}{2})$$

$$a^2 + \frac{4a}{14} - \frac{v}{2}a = a^2 + \frac{a}{\epsilon} - \frac{15}{\epsilon}a$$

$$\frac{13}{14} = -\frac{1}{\epsilon}a \Rightarrow a = -\frac{13}{\epsilon}$$

$$a_1 = \frac{a_n}{v} = \frac{-13}{\epsilon} - \frac{v}{2} = -\frac{13}{\epsilon}$$

$$a_p = \frac{a_n}{v} = \frac{-13}{\epsilon} - \frac{v}{2} = -\frac{13}{\epsilon}$$

$$a_{11} = \frac{a_n}{v} = \frac{-13}{\epsilon} - \frac{v}{2} = -\frac{13}{\epsilon}$$

$$\boxed{q = \frac{5}{r}}$$

حجراتِ نزدماً متعاقباً خستید چس می‌توانند عیب باشند!

$$q = 1 \rightarrow {}^3a = v^3 \rightarrow a = \frac{v^3}{r}$$

$$aq^r - a = d \xrightarrow{q=1} \frac{v^3}{r} - \frac{v^3}{r} = 0 \rightarrow d = 0$$
