

$$\frac{4!}{3! \times 1!} = 4 \quad -15$$

$$111 / 112 / 113 / 123 / 233 / 331 \quad -19$$

$$9 + 3 \times 6 + 1 = 19$$

$$\binom{4}{2} \binom{4}{2} = 90 \quad \text{مسیر}$$

$$90 + 24 = 114$$

$$\frac{1!}{0! \times 1!} = 1 \quad -18$$

$$114 + 1 = 115 \quad -19$$

$$115 + 1 + 1 = 117$$
